## Transillium® box of 100 caps.

### All-in-one formula

Transillium® is an combination of BLOND PSYLLIUM + MICROBIOTIC STRAIN.

**THE BLOND PSYLLIUM (2)** contributes to digestive and intestinal comfort and helps to maintain a normal transit :

- Rich in soluble fibers that resist passage through the stomach.
- It increases the stool weight and their water content.

- This gives them a consistency which facilitates their evacuation by the stimulation of the intestinal walls contraction.
- It facilitates the re-education of the intestinal function during its passage within the small intestine without being modified, and it covers the mucous membrane, acting as emollient and lubricant (3)

- The fibers are then used by the bacteria as a substrate and undergo a total or partial fermentation which favors the balance of the intestinal microflora (4)

**THE MICROBIOTIC STRAIN** *Bifidobacterium Lactis* BS01 is protected by a patented microencapsulation process (Microbac®) which allows the delivery of the living probiotic strains into the small intestine and colon, where they can act. Their consumption contributes to the balance of the normal intestinal microflora.

Should not be used :

- For children under 15 years old.
- As a precaution, this product is not recommended for pregnant and nursing women.
- In case of concomitant medication.
- For people allergic to one of the constituents.
- For people with a narrowing of the stomach or intestines.

### **Ingredients :**

#### **Blonde vegetal capsule**

**Blond Psyllium** (seed teguments of *Plantago ovata* Forssk in powder), anti-caking agent: tricalcium phosphate, capsule of vegetal origin (gelling agents: hydroxypropylmethylcellulose, gum, gellan).

#### **White capsule**

**Microbiotic strain:** fructo-oligosaccharides, anti-caking agent: microcrystalline cellulose, tricalcium phosphate, bulking agent: maltodextrin, coating agent: mono and diglycerides of fatty acid, encapsulated *Bifidobacterium Lactis* BS01, capsule of vegetal origin (gelling agents : hydroxypropylmethylcellulose, gellan gum).

EU and Non-EU ingredients.

May contain traces of soy.

#### **Instructions of use:**

When taking the food supplement Transillium®, it is important to maintain a daily water consumption high enough, between 1.5 and 2 liters.

Take the capsules of Blond Psyllium and *Bifidobacterium Lactis* BS01 during 20 days.

Transillium® can be taken again within the framework of a healthy lifestyle.

- Take **2 blond vegetarian capsules of Blond Psyllium** a day, the morning and midday during lunch time with a big glass of water.  
If needed, it is possible to take the 4 capsules at once.  
It is also possible to open them and to pour the powder they contain in the food, with the caution that it is not too hot, frozen, or alcoholic.
- Take **1 white capsule of Microbiotic Strain** a day, not during lunch time.

### Instructions of use :

- Transillium® is a food supplement
- Transillium® should not be used as a substitute for a varied diet. To use in supplement to a balanced diet and a healthy lifestyle.
